Registration No. BR-26-0080476

About DSpace

DSpace is the software of choice for academic, non-profit, and commercial organisations building open digital repositories. It is free and easy to install “out of the box” and completely customisable to fit the needs of any organisation. DSpace is a web application that allows researchers and scholars to publish documents and data. DSpace repository software serves a specific need as a digital archives system, focused on the long-term storage, access and preservation of digital content. DSpace preserves and enables easy and open access to all types of digital content, including text, images, moving images, mpegs and data sets.
